Neuropsychology and
Substance Use:
State-of-the-Art and ... -
Substance use continues to
be a major public health
problem, and the
ramifications of this are
manifold. For instance, at

present, on a yearly basis,
the total economic cost of
substance misuse is literally
hundreds of billions of
dollars. Neuropsychology
and Substance Use:
State-of-the-Art and ... - To
date, there has not been a
time-efficient and
resource-conscious way to
identify cognitive
impairment in patients with
substance use disorders
(SUD). The present study
assesses the validity,
accuracy, and clinical utility
of a brief (10 min)
screening instrument, the
Montreal Cognitive
Assessment (MoCA), in
identifying cognitive
impairment among SUD
patients. Rapid Cognitive
Screening of Patients with
Substance Use ... -
